

Table 1: Project Requirements

ID	Requirement Description	Priority
1	User authentication for farmers and consumers	3
2	Product catalog management with detailed product information	2
3	Seamless order processing and tracking system	1
4	Integration of secure payment gateways	1
5	Implementation of geographical filters based on user location	2
6	Climate filters for personalized recommendations	2
7	Responsive and user-friendly UI/UX design	3
8	Integration of a feedback and review system	2
9	Robust backend system with php for scalability	1
10	Frontend development using (Html,Css,Js) for a dynamic interface	1
11	Efficient database management with MySql	1
12	Cross-browser compatibility and testing	3
13	Mobile responsiveness for a broader user base	2
14	Implementation of a notification system for users	2
15	Documentation of codebase and user guides	3
